

PROJECT OVERVIEW

- By using a swingstage we were able to eliminate the use of conventional scaffolding around the Townsville civic theatre. Thus reducing the amount of gear needed for the project and saves the client time and money.

Using innovation to solve problems and a design team that thinks strategically, we were able to save this client considerable time and money compared to other scaffold contractors. By using a swingstage system we were able to eliminate the use of conventional ground up scaffolding around the Townsville Civic Theatre. Being one of Townsville's oldest and most recognised buildings, the team took great satisfaction in devising a plan to get this unique structure restored to its formal glory as quickly as possible. By using a swingstage system we were able to reduce the amount of gear needed for the project, which reduced our resources and time on site, which saved our client significant time and money. Thus, enabling the civic theatre to be back up and running in no time.
